

Canine Vaccines

When it comes to vaccinating your pet, it's easy to become overwhelmed with choices and information. Our vaccine protocols are tailored to your dog's lifestyle and health, and our team of veterinary professionals are trained to guide you.

VACCINES RECOMMENDED FOR ALL DOG LIFESTYLES:

RABIES

Under Indiana state law, dogs and cats older than 3 months must be vaccinated against the rabies virus. Rabies attacks the nervous system and can be fatal to both people and pets alike.

DAPP (DISTEMPER)

This core vaccine protects against four of the most commonly contagious viruses (Distemper / Adenovirus / Parainfluenza / Parvoviral), which can be deadly to an immunocompromised pet.

LEPTOSPIROSIS

The leptospira virus is considered endemic in Marion County and the upper Midwest. This virus is highly contagious and we recommend this vaccine to all Indiana pets.

THE ACTIVE ADVENTURER is a dog who loves a good hike or romp in the grass. This lone wolf has room to run and doesn't hang out with a lot of other dogs. They're your favorite camping buddy and they're not afraid to get dirty!

Recommended Vaccines: Lyme

THE CITY COMPANION is comfortable with urban life. These well-adjusted pups are content with a small yard, public green space, or a brisk walk around the block. They're all about the sights, sounds, and best of all, smells!

Recommended Vaccines: Bordetella + Canine Influenza

THE HAPPY HOMEBODY lives for quality time and snuggles. They don't go outside their home or yard, and they love being the only child. They don't require anything but their best friend and a good lap to lay on.

No Additional Vaccines Necessary

THE POPULAR PUP has a lot of friends in their pack. This socialite can't wait to go to doggy daycare, boarding kennels, the dog park, or the grooming spa! They're playful, approachable, and won't say no to a game of keep-away.

Recommended Vaccines: Bordetella + Canine Influenza

All City Way Animal Clinics locations require proof of Rabies vaccination.

Furr: Pet Spa & Wellness also requires proof of Distemper, Bordetella, + Canine Influenza vaccines.
